FULL STACK DEVELOPER

Khonkaen 40000 Thailand | Phone: 0980969178 | Email: anuphap.th02@gmail.com

GITHUB | LINKEDIN | PORTFOLIO

SUMMARY

Full Stack Developer at Waygrown Solution since June 2025, building government digital services for the Department of Agriculture with Next.js, NestJS and PostgreSQL. B.Sc. in Computer Science from Khon Kaen University, with hands-on software testing experience using Robot Framework and SonarQube. Outside work, I design and ship personal web projects end-to-end, from the data model and access control to the deployed application.

CORE COMPETENCIES

- **Frontend:** Next.js, React, TypeScript, Tailwind CSS
- **Backend:** NestJS, Node.js
- **Data:** PostgreSQL, MySQL, Supabase, Firebase
- **DevOps:** Docker, Kubernetes, Git
- **Testing:** Robot Framework, SonarQube
- Component-based architecture, UX/UI fundamentals

EDUCATION

Bachelor of Science in Computer Science — 2021 - 2025

Khonkaen University / GPAX: 3.12

WORK EXPERIENCE

Waygrown Solution | Full Stack Developer — June 2025 - Present

Client projects for the Department of Agriculture

- **e-Seed Analysis Certificate:** worked across the NestJS backend, the citizen portal and the lab back office of an online seed-quality analysis and certificate service.
- Worked on e-certificate PDFs with QR codes, real-time lab status updates over WebSocket, and ThaiD login.
- **DOA-RIBS** (research information and budget system): main frontend developer in Next.js, covering multi-step approval workflows and dashboards.
- Co-developed a background job service that prepares report data ahead of time.

Senior Project | Khon Kaen University — June 2024 - March 2025

UX Community Share

- Built a Next.js and Firebase web app where students in university UX courses log in and share their UX/UI projects.
- Added comments and likes for peer feedback, plus automatic image tagging with Google Cloud Vision API.
- Built an admin dashboard for instructors to manage posts and user accounts.
- Served by Nginx on a university VM, accessed through the university VPN.

Office of Digital Technology Khon Kaen University — April - May 2024

Network engineer internship

- Configured and managed network devices, including switches, VLANs and network systems for the university library.
- Troubleshot issues and optimized network infrastructure for stable, efficient performance.

Awards | The 11th NCTIM 2025 — March 2025

- Excellent Presentation Award (only 7 awards given across 7 topics)

SELECTED PROJECTS

- **E-learning SMAC** (Next.js, Supabase, Gemini API): online learning platform for nursing students with an AI tutor chat, quizzes and Supabase Row Level Security by year and class group.
- **SMNC Dashboard** (Next.js, TypeScript, Supabase): digital repository of a nursing college's research, innovation and IP, with RLS-based roles and Word/PDF report export.
- **Dorm billing PWA** (Next.js, TypeScript, Supabase): per-room rent and utility billing, bills shared to tenants via LINE, overdue tracking.
- **Pixel Pomo** (React, TypeScript, Vite, Electron): task list with a Pomodoro timer, calendar and completed-work summary.

OTHER SKILLS

Languages: Thai (Native) / English (Independent)
